

Hearing Protection

uvex i-gonomics

Measurable stress reduction for hearing protection

uvex has developed the ergonomic product system – uvex i-gonomics, which delivers optimum fit, low weight and optimum temperature – a combination which significantly increases wearer comfort. Hearing is precious and can be easily damaged. Wearing low pressure, non-irritant uvex earmuffs ensures wearers securely protect their hearing even when worn for long periods of time.

uvex K2

The uvex K2 earmuffs deliver outstanding comfort and a pressure free fit through the use of lightweight materials; compact and extra-soft cushioned ear pieces together with a breathable headband. These critical ergonomic characteristics are reflected in a top RI value of 4.07.

force

- Test method: contact pressure measurement and determination of absorption figures
- Test result: pressure/absorption figure = 0.31 N/dB (IW 3.9)
- Ideal seal without irritating pressure points

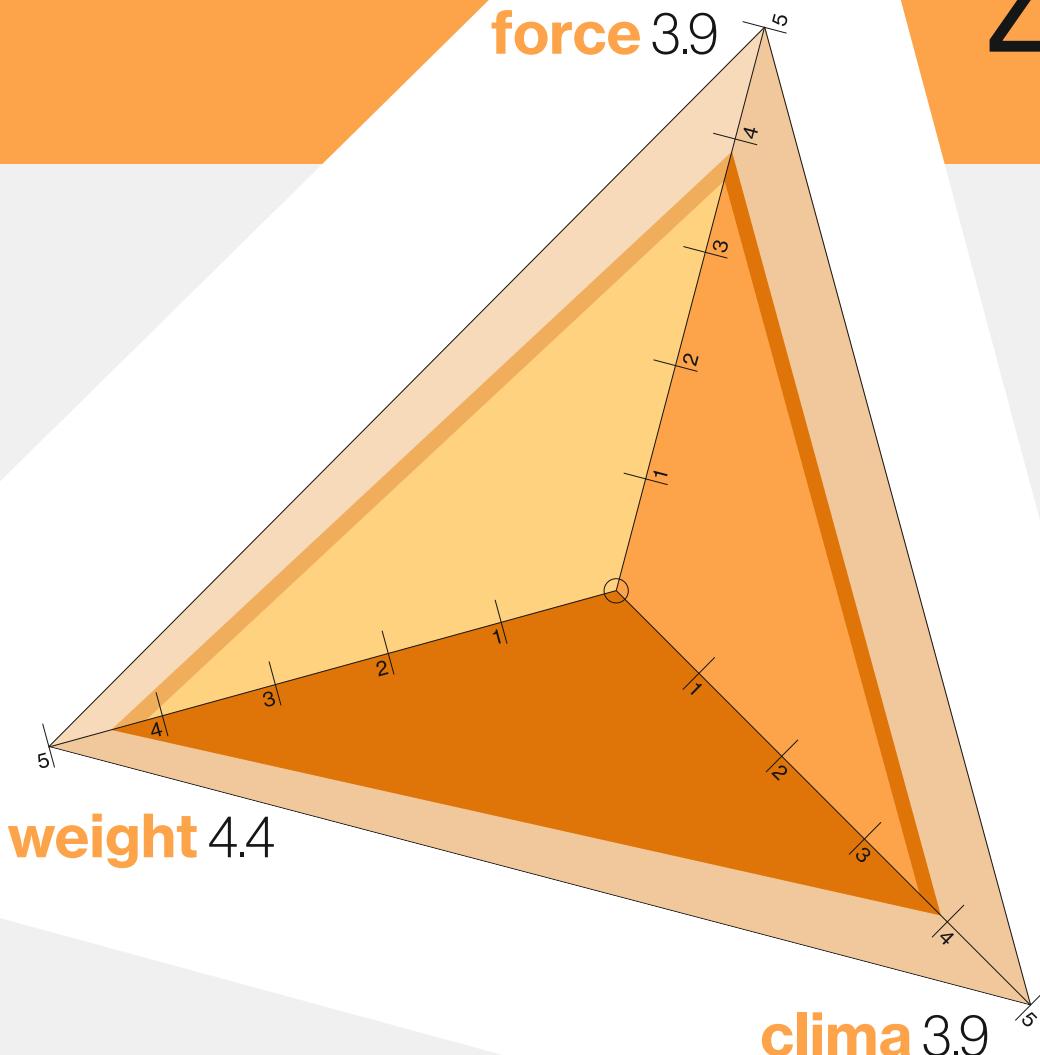

Relief-Index

4.07

The relief index is calculated using the mean value of the three index values (IV) for force, weight and temperature - ranging from 0 (= poor) to 5 (=perfect).

weight

- Test method: weight and absorption figure measurement
- Test result: product weight/absorption figure = 6.8 g/dB (IV 4.4)

• A high comfort factor reduces the onset of fatigue

clima

- Test method: Identification of heat build-up and absorption figure measurement
- Test result: Temperature/absorption figure = 1.07 °C/dB (IV 3.9)

• Optimum wearer comfort even in warm/hot temperatures

Hearing Protection

All ears when it comes to safety

Noise-induced hearing loss is still one of the most common occupational hazards.

It generally develops painlessly and without warning and the risk to hearing and the importance of hearing protection are often recognised too late.

Only those who suffer from hearing loss really understand just how essential a good sense of hearing is and that protecting it should be a top priority.

What is noise?

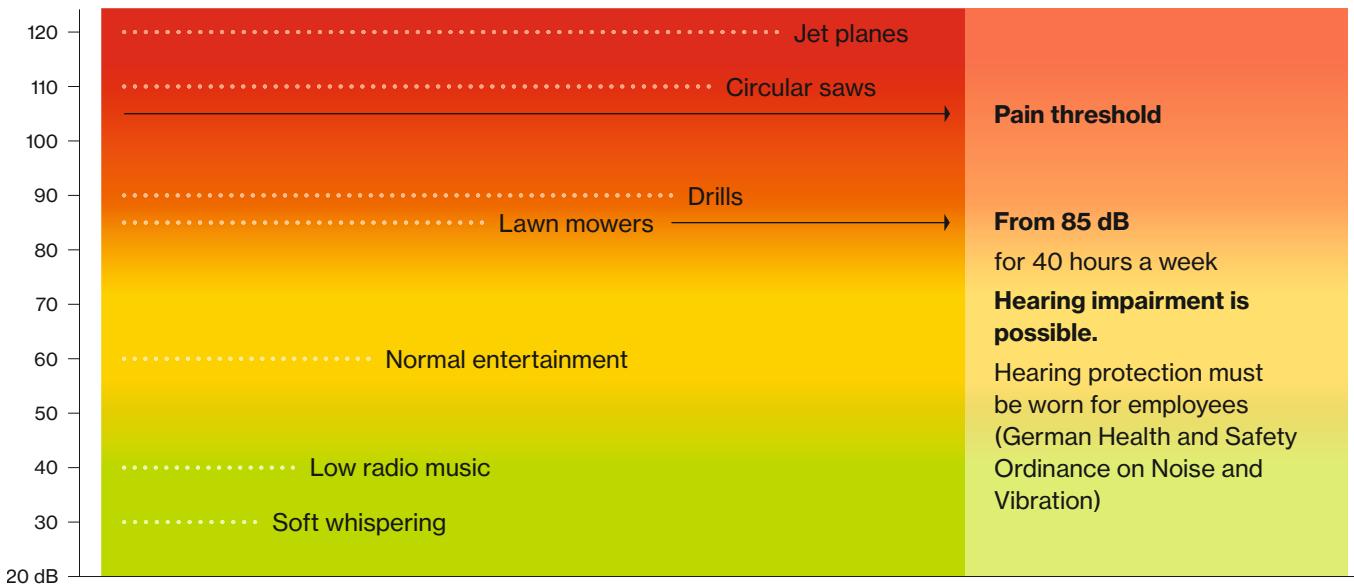

Noise is not only loud sounds, which can damage hearing, but also sounds that are perceived as disruptive and debilitating.

For example, a clock ticking or a dripping tap may impair concentration.

What are the consequences of noise?

We use our hearing continuously, day and night. Our hearing never gets a break and cannot be "switched off". We are exposed to noise every day, all day, whether it's noise at work, traffic noise or going to a concert; our hearing is under constant stress.

These daily demands on our ears can lead to noise-induced hearing loss. However, it's not just our hearing that is affected; noise means stress for the entire human organism. Noise affects the whole body subconsciously and this can lead to difficulty concentrating, gastrointestinal illnesses, high blood pressure and even increased risk of a heart attack.

Hearing Protection

All ears when it comes to safety

Tests and standards

All uvex hearing protection products comply with the CE standard and have been tested in accordance with the applicable European standards in line with current EU legislation.

Continuous quality assurance with ISO 9001/1994.

Applicable DIN EN norms are:

- EN 352: Part 1 Ear muffs
- EN 352: Part 2 Ear plugs
- EN 352: Part 3 Ears muffs attached to a safety helmet

Signal recognition

When a risk assessment is carried out by a Health and Safety professional or external qualified service provider hearing protection products can be categorised as particularly well-suited to use in specific areas of application.

The classifications are defined as follows:

- S** Signal hearing in railway track superstructure construction
- V** Signal hearing in road traffic
- W** Alarm signal hearing, general
- E** Signal hearing for locomotive drivers in railway operations

Hearing Protection

Making the right choice is essential

What level of protection is required?

The noise situation in the workplace must be defined first in order to determine what level of protection is required. To do this, the Health and Safety professional or external qualified service provider has to measure the noise levels.

The continuous noise level and, if necessary, the peak emission noise level are measured, enabling a noise profile to be recorded.

Appropriate hearing protection can then be selected using the SNR method.

Hearing protection: choosing the right product using the SNR method

Objective: noise level – SNR value

The objective when choosing suitable hearing protection is to achieve an effective residual noise level of between 70 dB and 80 dB for the wearer.

If sound insulation is too high (over-protection), this can result in an inability to communicate and the risk of not hearing critical messages or instructions.

Example:

- Noise level 100 dB
- uvex xact-fit, SNR 26 dB
- = 74 dB

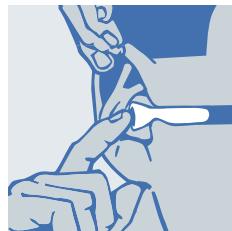

How to fit a hearing plug?

Correct hearing protection insertion

Earplugs must be inserted correctly to ensure the specified SNR value is achieved.

1. Roll the earplug into a cylinder between your fingers.

2. Reach over your head with your opposite arm and gently pull your outer ear outwards and upwards to straighten the ear canal. Gently insert the rolled up earplug into the ear canal and hold in place for a moment whilst it expands to the shape and size of the ear canal.

3. A correct fit for maximum protection and optimum wearer comfort.

Hearing Protection

Different situations, different ears

Hearing protection for every situation

There are many varieties of uvex hearing protection that are suitable for different situations and if you work in or are passing through high noise level areas you need the right level of protection.

If you are disturbed by machine noise or in your office, you want to shut out the noise but not feel isolated so with the right protection, damaging or irritating noise is eliminated, but important alarm signals can still be heard and speech perception is maintained.

Every ear is different

All ear canals vary in shape and size, so earplugs must be able to provide the right fit.

For this reason, uvex offers a variety of options for hearing protection, which are suitable for different shapes and sizes.

Hearing Protection

Disposable ear plugs

uvex xact-fit

- disposable earplugs uniquely shaped to match the anatomy of the ear canal
- tapered plug shape ensures natural, pressure free fit – maximising comfort and protection levels
- left / right pod carriers simplify fitting and ensure accurate fit every-time
- replacement earplugs can be dispensed through the standard uvex wall mounted dispenser unit
- sealed PU foam reduces the potential for contamination
- adjustable neck cord can be altered to wearers requirements for increased safety

uvex K series

High-protection in a perfect design

The features of the new uvex K series earmuffs provide wearers with appropriate protection and paralleled comfort.

Low weight

Wearers will appreciate the very low weight.

Colour coding

An easy to understand traffic light system supports correct product selection.

A wide range of earmuffs:
ideally equipped for all situations.

Soft-covered ear cushions
adapt perfectly to wearers' facial contours.

Padded headbands
for optimum wearer comfort.

Hearing Protection

K series · Passive earmuffs · Features

uvex K series

Length adjustment
Easily adjustable for a perfect fit and optimum protection.

Padded headband
Padded headband for optimal comfort, when worn for long periods.

Memory foam
Wearer comfort guaranteed thanks to extra soft memory foam ear cushions, even when worn for long periods.

Extremely light weight
Comfortable when worn for extended periods and less weight to carry.

Certification
Certified in accordance with EN 352-1, Australian Standard AS/NZS and ANSI.

uvex K200

Length adjustment
Easily adjustable for a perfect fit and optimum protection.

Optimum fit
Adjustable headband for a perfect fit and optimum protection.

360° rotation
Range of positions possible with 360° capsule rotation. Earmuffs with a headband can be worn under the chin or around the neck.

Dielectric
Metal-free earmuffs suitable for use in workplace environments with exposure to electrical voltage.

Accessories

Replacement pads
Replacement pads for lasting comfort and hygienic use.

Comfort pads
Self-adhesive comfort pads for maximum comfort, even in higher temperature environments.

uvex K1H · uvex K2H

Length adjustment
Easily adjustable for a customised fit to ensure optimum protection.

Resting position
Earmuffs can be rotated 360° for easy use from standby and resting positions.

Helmet-visor combination
uvex earmuffs can be combined with uvex safety helmets to ensure complete all-round protection for the head.

Hearing Protection

uvex pheos helmet system

Adapts perfectly to your requirements –
thanks to the flexible modular system.

Every detail of the new pheos helmet system has been carefully thought through to deliver an advanced head protection solution. The magnetic locking system makes it

simple to attach the visor and ear muffs, while the ergonomic joint system makes it extremely comfortable to wear for long periods.

Magnetic lock system
for visor and ear muffs

One click attachment system

The unique magnetic lock system allows parts to connect easily – the helmet does not need to be removed when attaching or changing the ear muffs.

Extra-soft ear muffs

Wearer comfort guaranteed thanks to extra-soft memory foam ear cushions, even when worn for long periods.

uvex academy

The essentials of hearing protection

A practical introductory seminar on the risks arising from excess noise and the appropriate measures to safeguard hearing.

- principles and importance of the vital sense of hearing
- hearing difficulties and tinnitus demo
- comprehensive overview of the challenges facing industrial hearing protection, standards and the hearing protection products on offer
- explanation of the different methods of measuring noise levels and how to put these methods into practice
- information on the classification and labelling of safety products
- noise exposure in the workplace
- essential information on applications of the various types of PPE, such as disposable earplugs, reusable earplugs, dispensers, banded ear protectors, passive and level-dependent ear defenders and otoplastics
- how to wear and use hearing protection equipment correctly

Target group

Those responsible for the health and safety of employees within a company, e.g. health and safety officers, occupational health practitioners, company doctors and specialist purchasers.

For more information or to book a place, please visit uvex-academy.de, call +49 (0)911 9736 1710 or email academy@uvex.de
