protecting people

protecting people

Active occupational health and safety with personal protective equipment (PPE)

Ladies and gentlemen,
valued customers,

Our mission statement is
protecting people.

For us, this is much more than a mere marketing slogan. Our objective is to protect people at work. With this comes a huge responsibility, requiring us to ensure our efforts are focussed on developing products and services which minimise workplace hazards. We view our task as not only optimising protection via high-performance, product-based solutions, but also by taking an active role in terms of risk prevention. We are aiming to resolve the question: "How can we capitalise on the potential offered by PPE to ensure and maintain the performance capability and health and safety of employees in the workplace?"

The answer to this lies in a strategic approach to ergonomics, which intensively deals with the relationship of stress and strain. In order to integrate scientific findings in PPE products, we have developed a product system over the past few months which is designed to relieve the strain on wearers as effectively as possible.

With a defined "relief index", we are able to introduce empirically verifiable features for each product which demonstrably prevent physical strain to ward off damage to long-term health.

With the product system "i-gonomics", our intention is to do our bit in maintaining the health of your employees. Place your trust in our product and service solutions and together we can shape the working world, ensuring it is even safer in the future.

The **UVEX SAFETY GROUP GmbH & Co. KG**
management:

Stefan Brück (CEO)
Peter Buschmann
Stefan Wehner

uvex is the innovative

brand systems provider

with international manufacturing expertise. We also have a highly qualified network of strategic partners that allows us to meet wide-ranging market and customer requirements.

Innovation

We develop, manufacture and distribute industrial safety products that fulfil the highest standards in terms of quality, function and innovation. With our comprehensive service concept, we are pursuing the goals of generating measurable added value for customers around the world. We strive to be the leaders in innovation in our field.

Quality

As manufacturers, we place extremely high quality demands on our products and services. For us, "made in uvex" is a promise of quality we make to our customers, which they can always count on. Our aim is to effectively balance economical, ecological and social commitment. In order to achieve this, we have set demanding standards for our manufacturing sites and products, which also apply to all partners in our network.

Business is people

People are at the heart of what we do. Protecting people is our company's goal. We offer our employees opportunities for professional and career development in an international group.

The winner's podium

is our ultimate target.

Quality Made in uvex

Creating value

Only companies that are prepared to take full responsibility for the development and manufacturing of their own products and the necessary performance which go hand-in-hand with this can guarantee quality and safety. From initial development sketches and mould construction to final quality controls, uvex has a controlling influence across all product parameters. The comprehensive nature of this entire supply chain control means that uvex is well-placed to ensure the quality of its own products to the highest possible degree.

Offer greater quality

Product quality is today often measured unilaterally against the standards and norms which must be fulfilled in order to receive industry-specific certification. uvex goes one step further. Beginning with product development and inspection in the company's own testing laboratories, uvex undertakes to ensure not only that standards and norms are met in full as a matter of course, but that uvex products actually exceed these norms. This provides extra security

Improving facilities

uvex was founded in 1926. In the following years, uvex set about designing, developing and manufacturing its own safety goggles at the Group's plant located in Fürth, Germany. To this day, uvex has steadfastly adhered to its "made in uvex" demand for quality and relies on the technological expertise, comprehensive know-how and first-rate training of its employees at sites in Germany, throughout Europa and overseas.

For uvex, quality is far more than the sum total of positive characteristics. Quality is a culture which pervades the company, its objectives, products and services at all levels.

Preserving resources

Carbon dioxide: 327.4 t. Machine oil: 4,000 L. Energy: 542 Mwh. These are extracts from uvex's 2014 energy saving balance sheet. Whether it's reducing emissions of harmful substances, minimising the consumption of raw materials in production processes or decreasing levels of noise pollution: a mindful attitude towards preserving resources is one of the core focusses of uvex's corporate philosophy. Anything uvex saves is reinvested. It goes into improving the quality of our facilities and therefore also the quality of our products.

Maintaining independence

As a third-generation family company, uvex represents stable, long-term development of a corporate brand and the products and services associated with this. New investments are Funded out of the Group's own capital. uvex's version of sustainable corporate policy means that company is managed responsibly and retains financial independence.

Optimising tools

The quality of a finished product is only ever as good as the quality of the raw materials and tools used in the manufacturing process. To meet the highest standards in this regard, uvex develops its own tools and manufactures them in tandem with long-standing, reliable partners. This close cooperation between individual links in the supply chain means that uvex is able to also indirectly ensure the quality of its products.

From initial idea to top quality product

Systems provider with manufacturing expertise

uvex safety is synonymous with exceptional health and safety solutions, which meet the most demanding conditions. Comprehensive know-how, state-of-the-art technology and an uncompromising quality management form the basis of this. Virtually 80% of the entire value-added created is generated in uvex's own production facilities.

Innovative protective eyewear products – from safety spectacles to laser protection goggles – are manufactured at a centre of excellence located in the Group's headquarters in Fürth, Bavaria. Mechanical and optical properties are tested in the uvex test laboratory.

The production facility in Ellefeld, Saxony, specialises in corporate fashion and innovative protective clothing, providing customers with the benefit of expert advice from the initial idea through to delivery of custom-made textile products.

The centre of expertise at Lüneburg produces the uvex range of highly sophisticated safety gloves. The modern production facility ensures superb product quality across every stage of the manufacturing process, from yarn development to the individual production of customised items.

The "made by uvex" promise also applies to our European factories, such as to hearing protection specialists, Swedsafe, in Sweden, or our shoe manufacturers in Italy. This means uvex products consistently win over customers with their pioneering technologies and first class quality.

New ideas for new challenges

"Standard" is not an option for uvex safety. As a specialist in occupational health and safety, uvex is setting new benchmarks. The revolutionary INTECT strategic innovation management program generates solutions which are tailored to suit customer needs and create genuine value-added.

uvex safety is constantly advancing its technological expertise for a fast, flexible response to new challenges. This is the only way to ensure that the high demand for quality placed on products and services can be met at all times.

In uvex safety, companies can rely on a competent partner aware of the precise requirements of their particular sector. This expertise is the best basis for top class occupational health and safety: uvex safety makes companies stronger – and gives them the security they require.
